DETAILED ACTION

Restriction/Election

Specie Election Requirement:

This application contains claims directed to the following patentably distinct species of the claimed invention:

Specie A: a method involving an enzyme binding to a substrate to produce a product

Specie B: a method as in Specie A but additionally being directed to a complex system of components as present in transcription-translation (as in claim 4)

Applicant is required under 35 U.S.C. 121 to elect a single disclosed specie for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-3 and 5-6 are directed to Specie A; while claim 4 is directed to specie B. This distinctness or independence of a method involving an enzyme binding to a substrate to produce a product (Specie A) versus a method directed to a complex system of components as present in transcription-translation (Specie B) is because each contains different method steps (i.e. Specie B contains protein synthesis as well as degradation) to achieve different goals. All of these usages are distinct as requiring distinct and different steps thereof

Art Unit: 1631

containing divergent subject matter. This divergent subject matter documents the undue search burden if they were searched together.

Applicant is advised that a reply to this requirement must include an identification of the specie that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should an applicant traverse the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Because these species are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 1631

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement may be traversed (37 CFR 1.143).

Papers related to this application may be submitted to Technical Center 1600 by facsimile transmission. Papers should be faxed to Technical Center 1600 via the PTO Fax Center.
